This policy statement sets out our environmental commitments. It has been endorsed by the Correct Contract Services (CCS) Directors, and is consistent with our corporate policies. Everyone working for the company, or on our behalf, is urged to support this statement.

This policy statement updates and replaces all previous statements. It will be reviewed regularly and, if necessary, a revised version will be issued to reflect the latest developments.

1. Introduction

Organisations of all kinds are, increasingly, determined to achieve and demonstrate sound environmental performance by controlling the impact on the environment of their activities, products and services. They do so in the context of growing environmental awareness, increasingly stringent legislation and other factors promoting environmental protection and best practice.

CCS is concerned about the environment and recognises that good environmental management must be an integral and fundamental part of our corporate business strategy.

2. Scope of Policy Statement

This statement applies to all parts of business. It covers all buildings, goods and services used and provided by the company and everyone working for us.

It covers: the immediate impacts of our activities and policies.

It excludes: indirect impacts of policy, taxation and enforcement that we cannot control or influence;
 our suppliers impact that we are unable to influence
 issues which involve national security.

3. Environmental Commitments

This policy supports the United Kingdom's strategy for sustainable development. It sets out a programme of continuous improvement to reduce the harmful impacts of our operations on the environment and to prevent pollution.

In the course of our operations and within resource constraints, we will improve our environmental performance by:

Resources

- 3.1 conserving energy, water, wood, paper and other resources, particularly those which are scarce or non-renewable, while still providing a safe and comfortable working environment;
- 3.2 reducing waste through re-use and recycling and by using refurbished and recycled products and materials where such alternatives are economical and suitable;
- 3.3 ensuring that any products used or derived from wildlife, such as timber and plants, are from sustainable sources, and comply with EU and international trading rules such as CITES (the Convention on International Trade in Endangered Species);

Pollution

- 3.4 monitoring relevant discharges and emissions to air, land and water to assess what action is necessary to reduce pollution or the risk of pollution;
- 3.5 phasing out, where practical, ozone depleting substances and minimising the release of greenhouse gases, volatile organic compounds, vehicle emissions and other substances damaging to health and the environment;

Management – Regulations

- 3.6 meeting, and in some cases exceeding, all relevant, current and foreseen statutory regulations (including the Environmental Information Regulations), official codes of practice and other requirements that we adopt; specifying contractors do the same when working on our premises; developing and maintaining, emergency procedures for effectively dealing with significant hazards where they exist and limiting the risk to health and the environment;

Management – Communication

- 3.7 communicating openly with staff and other stakeholders; educating, training and motivating our colleagues, and relevant others, to encourage them to support our environmental programmes and jointly develop new ideas and initiatives;
- 3.8 responding appropriately to reasonable external requests for environmental information;

Management – Purchasing

- 3.9 encouraging manufacturers, suppliers and contractors through our contracts and other means to improve or develop environmentally preferable goods and services at competitive prices;

Management – Estates

- 3.10 ensuring, where practicable, that buildings occupied by us are designed, constructed and operated to optimise their environmental performance;

Management – Environment

- 3.11 demonstrating that, where relevant, environmental issues are considered when making decisions, planning and developing policy, programmes and projects;
- 3.12 monitoring progress against the environmental aim and other indicators and producing a regular report for internal and external consumption.
