### Job Description

#### Job Purpose:

Carry out Installation of renewable technologies in line with all company procedures and MCS requirements across a range of clients and contracts including Housing Association, private customer and new build clients. To act professionally and efficiently at all times and to represent CCS in the best possible manner.

#### Duties:

- Maintains job time frame and standards of the company by working efficiently and safely with a high quality finish, working to CCS Internal Install specification/method statement.
- To deliver a high quality service to the client and their customers, having respect for all individuals and meeting the challenges presented.
- Carries out all works strictly in line with company procedures and all MCS standards within the industry: - code of practice and best practice.
- Repairs and minor works as and when required for installation call backs or remedial works.
- Maintain CCS code of conduct and working in occupied homes.
- To install all products and materials to the highest quality possible and in line with all manufacturer guidelines.

- To engage and liaise with stores and Planned Supervisor regarding materials and any variation works
- Book parts out on PDA.
- To clear each job from the hand held device and back office system as they are completed.
- To liaise with residents and CCS clients as and when required about the works being undertaken. Positively promoting CCS and our image.
- To ensure all PPE is present and correct at all times.
- To liaise with Planned Supervisor and assist with keeping the standards of the QMS and company quality manual.
- Act as MCS representative for inspections.
- Ensure all equipment is calibrated and in good working order.
- To ensure all appointments are kept and all CCS tenants/clients are kept informed.
- To carry out duties as required by any senior manager or members of staff representing such manager.
- To stay up to date with all codes of practice involving your given discipline.
- Carry out all reporting of variations to any works and updating administration department of changes to requirements on site.
- Responsible for engaging and attending all staff briefings and company functions.
- Contributes to team effort by accomplishing related results as needed.
- Liaison with all other engineers and staff to ensure targets are reached, organizing electrical works and building works on any given installation.
- Production of a certificate or job sheet for all works, any other reports or records required for the works.
- Submitting a valid and accurate time sheet, delivery notes, expenses and any other documentation weekly.

#### **Skills/Qualifications:**

- General competence in the given trade.
- NVQ 2 or equivalent in plumbing or heating systems.
- C&G energy efficiency.
- Water Regulations.
- Unvented Hot Water Systems.
- BPEC qualification or equivalent in installation of heat pumps. **(can be trained)**
- BPEC qualification or equivalent in installation of solar thermal. **(can be trained)**
- Punctuality, professionalism, flexibility and working knowledge of Mobile PDA.

#### **Experience Required:**

- Minimum of 3 years' experience.
- Experience of working within the all market sectors on installation projects and maintenance contracts.
- Experience of working with residents and clients directly.

- A clean UK driving license and DBS check will be required.

**We are an equal opportunities employer and we welcome applicants no matter what their ethnicity, gender, sexuality, beliefs or nationality.**
